

### **How to use a Fire Blanket on a kitchen stove fire**

1. You should always store your blanket close to the stove
2. When a fire starts remain calm
3. Pull tapes to release blanket
4. Protect your hands & body by holding the straps and keeping the blanket between you and the fire in a shield position and place over the fire – DO NOT THROW
5. Switch off heat
6. WATCH FLAME BEEN SNUFFED OUT
7. Naturally smoke will come thru the blanket this shows that the fire is been extinguished
8. Leave covered until cool – minimum time 20 minutes
9. Quick, clean, effective – no training required
10. At this stage you know the fire has been contained
11. Fire blankets can also be used to wrap around your body or clothing

Our fire blanket is fire resistant up to 1000 degrees fahrenheit, its large size 36" x 36" allows you to get close to the fire and to deploy the blanket over the complete pot or frying pan.
